APPENDIX I Police Automation Survey

APPENDIX II Police Departments Responding to the Automation Survey

APPENDIX III Police Department Employment

APPENDIX IV Police Department Computer Vendors

Massachusetts 1996 Police Automation Survey
EXECUTIVE SUMMARY

Introduction

The "Police Automation Survey" (Appendix I) was designed to obtain information relevant to the status of computerization, equipment and technology applications by law enforcement in the Commonwealth. Information provided in these areas is useful in coordinating of technological strategies and allocating limited resources. In many ways, the criminal justice community in Massachusetts has demonstrated some cutting-edge applications of technology, on the local, regional and state level. It is critical that we learn what is happening and what is still needed in order to coordinate these efforts.

Methodology

The survey was sent to all 351 municipalities and the State Police in Massachusetts in August 1996. The State Police and 302 police departments returned completed surveys, representing an 86% response rate. Taking into account that the State Police provides coverage for approximately 28 communities, respondents represented 93% of local police agencies.

Highlights of Findings

- Local police departments in the Commonwealth received well over 3.5 million **calls for service** in 1995;
- 246 police departments reported having **E-911** available in 1996;
- Almost a quarter of local police departments reported having access to the **Internet**; while 21 departments already have World Wide Web sites;
- In 1996, 167 local departments submitted **Uniform Crime Reporting (UCR)** data and 84 additional departments submitted **National Incident Based Reporting System (NIBRS)** data;
- Approximately 251 municipal police departments, 12 campus police departments, the MBTA and the State Police submitted some type of crime data;
- An ever increasing number of officers are entering **police reports into computers** directly, both in the station and out in the field;
- In less than one year, 99 departments have implemented **Offender Based Tracking Numbers (OBTN)**; 75 electronically;
- Though not legally required to do so, 90 departments reported submitting **fingerprints for misdemeanor arrests.**

Summary

The law enforcement community in Massachusetts has greatly improved communication capabilities and integrating new technologies into their organizational structures --all with limited resources. For example, entering police reports directly into laptops or mobile terminals in the cruisers increases accuracy, timeliness and accessibility of information, while decreasing the amount of time and personnel required. Similarly, many departments are using digitized photo equipment, which allows the electronic transfer of mug shots. This permits rapid dissemination of identifying materials for those wanted by the law enforcement community.

However, in order to comply with the federal Interstate Identification Index (III) and the National Instant Check System (NICS) (to name a few), Massachusetts needs to implement fingerprint supported criminal records and OBTN and increase linkages across criminal justice agencies statewide. These endeavors are a top priority for the Executive Office of Public Safety and are the essential goals of the Criminal Records Improvement Task Force, represented by various members of the criminal justice community.

AGENCY INFORMATION

To determine the scope and size of police departments responding to the survey, several questions were asked regarding volume of calls and arrests and personnel statistics.

1995 ARRESTS & CALLS FOR SERVICE

Departments reported making over 28,000 arrests for felony crimes and nearly 78,000 arrests for misdemeanor crimes in 1995. Furthermore, 253 departments report responding to over 3.5 million calls for service in 1995.

LOCAL POLICE DEPARTMENTS

Arrests & Calls for Service	Number of Departments	Number of Arrests or Calls for Service
Number of Felony Arrests	196	28,124
Number of Misdemeanor Arrests	206	77,944
Number of Calls for Service	253	3,652,521

STATE POLICE ONLY

Arrests & Calls for Service	Number of Departments	Number of Arrests or Calls for Service
Number of Felony Arrests	1	13,942
Number of Misdemeanor Arrests	1	5,701
Number of Calls for Service	1	125,000

EMPLOYEES

Respondents were asked to provide the number of police department employees as of July 1, 1996 (Appendix III). On average, the responding police departments employ 2.13 officers for every 1,000 citizens. A breakdown of employees were reported as follows:

Employees	Local Police	Local Avg. Rate/1,000 pop.*	State Police
FT Sworn	12,186 (N=280)	2.13	2,227
PT Sworn	2,083 (N=213)	2.07	0
FT Non-Sworn	2,184 (N=227)	.39	300
PT Non-Sworn	941 (N=189)	.54	0
Seasonal	463 (N = 47)	1.70	0

*Avgs. were calculated from the total populations represented by jurisdictions of responding police departments.

COMPUTER VENDORS

Respondents were asked to report the name/s of the computer vendor/s with whom they are contracted (Appendix IV). Three vendors were reported to service over 60% of survey respondents. The breakdown was as follows:

Vendor	# of Departments	% of Total
Pamet Systems	71	24%
IMC	66	22%
Microsystems	52	17%
Packetcluster	13	4%
QED	11	4%
Theta	9	3%
Larimore	8	3%
HTE (Chiefs)	6	2%
Other Vendor	51	17%

Note: Other Vendors listed did not exceed five responses.

COMPUTER EQUIPMENT

In an effort to determine the status of automation in Massachusetts police departments, several questions were asked about the type of computer equipment used by local departments.

MAINFRAMES/MINI-COMPUTERS

Respondents were asked to provide the type of mainframe or mini-computer that their department was currently using. Seventy-three departments reported not using a mainframe computer. The following types of mainframes/mini-computers are used by police departments:

Type of Mainframe/Mini-Computer	Number of Departments
DEC	57
IBM	53
Unisys	22
Wang	5
McDonnell-Douglas	3
Data General	3
None	73
Other	75

* 25 cases are missing

Note: Total number of departments does not equal 278 due to departments having multiple types of mainframes.

COMPUTER AND ELECTRONIC EQUIPMENT

Respondents were asked to provide the number of specific computer or electronic equipment currently used by their department. The following is a list of equipment, the number of departments that use the equipment, and the number of the listed items that are used.

Computer Equipment	# of Departments	Number of Items
Personal Computers	241	2,912
Printers	271	2,589
CJIS Equipment*	263	1,778
Police Radios	298	20,171
Fax Machines	286	486
Modems	209	588
Laptops	111	599
MDT's**	78	864
GPS Receivers***	11	64
Scanners	74	86

*Criminal Justice Information Services (CJIS) connected equipment
**Mobile Data Terminal's
***Global Positioning System (GPS) Receivers

DISPATCH CAPABILITIES

COMPUTER AIDED DISPATCH (CAD)

Respondents were asked to indicate the type of dispatching their department uses.

Type of Dispatching	Number of Departments
Computer Aided Dispatch (CAD)	185
Manual (not computerized) dispatch	71
CAD provided by other jurisdiction	32
Manual dispatch provided by other jurisdiction	14

* Four cases are missing
Note: Three departments reported having multiple dispatch capabilities

DISPATCH JURISDICTIONS

Respondents were asked what areas their department's dispatching covers. 199 departments reported their dispatch jurisdiction included both police and fire departments, while 103 departments dispatched for the police department only.

ENHANCED 911 (E-911)

Respondents were asked if E-911 was available in their jurisdiction. 246 departments reported having E-911 available. Of the departments that stated E-911 was not currently available, 44 departments expect E-911 to be available in 6 months and 8 departments expected E-911 to be available in one year. Two departments had no plans to implement E-911 in the near future.

NETWORK CONNECTIONS

Respondents were asked if, other than CJIS, personal computers were connected to a computer network. Seventy-four departments reported having Local-Area Network (LAN) connections, 16 departments reporting having Wide-Area Network (WAN) connections, and 13 departments reported having both LAN and WAN connections.

Additionally, departments were asked what other institutions were connected to their network. Thirty-two departments reported being linked to municipal offices, 17 were linked to fire departments, 8 were linked to school departments.

INTERNET CONNECTIONS

Respondents were asked if their police department has access to the Internet. More specifically, they were asked if they had e-mail capability and if the department had a World Wide Web (WWW) page. Sixty-eight departments reported having access to the Internet, 53 departments had E-mail, and 21 departments had a World Wide Web page.

PHOTOGRAPHIC EQUIPMENT

Respondents were asked to report the method their department used for photographing mug shots. The majority of departments used instant film to photograph mug shots, however, 52 departments reported using video recorders and 49 departments reported using digitized photographic equipment.

Type of Photographic Equipment	Number of Departments
Instant Film (Polaroid)	245
Rolled Film (negative/prints)	88
Video Recorder	52
Digitized	49

Note: Total number of departments does not equal 303 due to departments reporting multiple methods of photographing.

MOBILE COMPUTING

Departments were asked to provide the various types of equipment used in marked and unmarked cruisers. The responding departments reported having 3,720 marked cruisers (N=289) and 2,329 unmarked cruisers (N=233). Mobile Data Terminals (MDTs) were used in 815 marked cruisers and 49 unmarked cruisers. Furthermore, laptop computers were used in 300 marked cruisers and 33 unmarked cruisers. The following tables show the type of mobile computing capabilities for marked and unmarked cruisers:

Marked Cruiser Capability	Number of Departments	Number of Marked Vehicle Items
Marked Cruisers	289	3,720
MDTs	77	794
Laptop Computers	44	279
MDTs and Laptops	5	21
Neither MDTs nor Laptops	166	2,340

Unmarked Cruiser Capability	Number of Departments	Number of Marked Vehicle Items
Unmarked Cruisers	233	2,329
MDTs	14	48
Laptop Computers	20	32
MDTs and Laptops	1	1
Neither MDTs nor Laptops	142	1,898

COMPUTERIZED REPORTING:

UNIFORM CRIME REPORTING (UCR)

The Uniform Crime Report (UCR) program collects summary crime data on reported incidents and arrests from police departments across Massachusetts. 143 departments stated that they submitted UCR data to the State Police Crime Reporting Unit. Ten departments indicated that they intended to begin submitting UCR data within 6 months, and 8 more intended to begin submitting UCR data within one year.

NATIONAL INCIDENT BASED REPORTING SYSTEM (NIBRS) [1]

NIBRS is an automated NON-summary method of reporting crime statistics. Eighty departments reported to be submitting NIBRS data, with 60 planning to submit NIBRS within 6 months, 35 additional departments planned to submit within one year, and 57 departments with no current plans to submit NIBRS data. At least 64 departments attributed personnel shortages and/or

[1] These numbers were adjusted to correspond with the number of departments known to submit NIBRS data to the NIBRS Repository at the State's Crime Reporting Unit within the Massachusetts State Police.

computer limitations as reasons for not reporting NIBRS. Fifty-five departments stated that they submit neither UCR nor NIBRS data.

COMPUTERIZED FORMS:

Departments were asked if they have the capability of completing police report forms on a computer. 230 departments reported having this capability.

Capable of completing forms on a computer	YES	NO
Capable of completing forms on a computer	230	73

Respondents were provided a listing of types of police report forms and were asked to indicate which of the department's forms were computerized. The following types of forms were reported to be computerized by the responding departments:

Types of computerized forms	Number of Departments
Arrest/Crime Records	215
Accident Reports (traffic)	184
Booking	211
Firearms Licensing	107
Incident Reports	216
Domestic Abuse	44
License/Registration	42
Traffic Tickets	126
Other	113

Departments were also asked to explain how data from police report forms is entered into their computer system.

Types of Data Entry Systems Used	Number of Departments
Officer fills out a paper form in the field then enters it into the computer at a later time.	131
Officer fills out a paper form in the field then the form is scanned into the computer.	3
Officer fills out a paper form in the field then the form is entered into the computer by others.	68
Officer fills out a paper form in the field on a laptop computer and later downloads the information into a central repository.	9
Officer fills out a paper form in the field on a laptop computer and transmits the information via radio or cellular technology into the in-house computer.	17
Officer calls in the information and someone at the police department enters the data into the computer	42
Other	76

Furthermore, departments were asked to indicate how each type of police report is entered into the department's computer system.

Types of Forms Used with Data Entry Systems	Number of Departments								
	Arrest	Accident	Booking	Firearm	Incident	Domestic	License	Traffic	Other
Officer fills out a paper form in the field then enters it into the computer at a later time.	51	85	37	21	81	39	14	53	10
Officer fills out a paper form in the field then the form is scanned into the computer.	1	3	1	2	1	1	1	2	0
Officer fills out a paper form in the field then the form is entered into the computer by others.	19	34	8	9	28	15	8	33	7
Officer fills out a paper form in the field on a laptop computer and later downloads the information into a central repository.	3	5	1	0	7	1	0	2	1
Officer fills out a paper form in the field on a laptop computer and transmits the information via radio or cellular technology into the in-house computer.	5	4	3	0	13	2	0	1	5
Officer calls in the information and someone at the police department enters the data into the computer	13	17	4	2	27	10	10	14	5
Other	45	24	47	18	38	14	11	18	20

ACCESSIBILITY OF POLICE REPORT FORM SOFTWARE

More than half of the responding departments did not have report form software connected to a Computer Aided Dispatch (CAD) system. One hundred six departments reported that their form software was accessible through a PC connected to a network and 87 departments reported the software was accessible through a mainframe computer.

Form Software Part of a CAD System	YES	NO
Form Software Part of a CAD System	132	171

How Form Software is Accessible	Number of Departments
A PC Connected to a Network	106
A Mainframe Computer	87
A Stand Alone Computer	33
Other	11

* 97 cases are missing

Note: Total number of departments does not equal 206 due to departments having multiple ways of accessing the form software.

OFFENDER BASED TRACKING NUMBERS (OBTN)

Offender Based Tracking Number's (OBTNs) are tracking numbers assigned at the point of arrest (associated with an arrestee's fingerprints) used to track an offender through the criminal justice system. OBTNs are unique identifiers applied until a positive identification can be made of an offender for a specific event and a State Identification Number (SID) is assigned.

Respondents were asked if they had implemented a OBTN system. Ninety-nine departments reported having implemented OBTN. Of those, 75 departments have implemented OBTN electronically and 76 departments are attaching OBTNs to fingerprint cards. Eight departments reported utilizing Barcodes for OBTN.

JUVENILE LOCKUP

According to Federal regulations, alleged juvenile delinquents may be held securely in a police lockup for up to six hours for processing purposes only and status offenders (i.e., runaways, truants, etc.) may not be detained in secure police lockup for any amount of time. One hundred seventy departments responding to the survey reported to have at least one juvenile cell that has been approved by the Department of Youth Services.

Departments are required to submit juvenile lockup data on a monthly basis to the EOPS Programs Division. In 1996, departments were offered the option of reporting lockup data electronically via their CJIS terminal. When asked if juvenile lockup data was reported electronically via the CJIS terminal or on paper forms, responses were as follows:

Method of Lockup Data Submission	Number of Departments
CJIS	59
Paper Forms	111
Do not submit the data	3
Other	3
CJIS and Paper Forms	8
CJIS and Other	1

* 118 cases are missing.

Reasons for not submitting lockup data via CJIS	Number of Departments
Did not know it was possible	33
Do not know how	7
Would rather submit the paper forms	18
Do not have access to a CJIS terminal	10
Other	36

*209 cases are missing

Note: Total number of departments does not equal 93 due to multiple responses.

OPERATING UNDER THE INFLUENCE (OUI)

Respondents were asked if their department reports OUI's on CJIS. 222 departments reported using CJIS to submit OUI data and 46 departments reported submitting OUI data on paper forms and 22 departments submitted OUI in combination of CJIS, paper forms and/or other methods. Four departments stated that they did not report OUI data.

Reasons for not submitting OUI data via CJIS	Number of Departments
Did not know it was possible	9
Do not know how	6
Would rather submit the paper forms	9
Do not have access to a CJIS terminal	9
Other	17

* 259 cases are missing

Note: Total number of departments does not equal 43 due to multiple responses.

FINGERPRINTING

Respondents were asked to indicate the method their department uses for fingerprinting subjects.

The majority of departments use ink, however, three departments have live-scan capability.

Method of Fingerprinting Subjects	Number of Departments
Ink	278
Live-scan	3
Other	21

* 7 cases are missing

Note: Total number of departments does not equal 296 due to departments using multiple methods of fingerprinting subjects.

Although efforts are underway to designate the State Police to be a single source of fingerprint submissions to the FBI (in order for Massachusetts to become III compliant), survey results showed that 161 departments were submitting fingerprint cards to both the State Police and the FBI.

Fingerprint Card Submission	Number of Departments
Submits to the State Police	93
Submits to the FBI	9
Submits to the State Police and FBI	161
Other	25

* 18 cases are missing.

Note: Total number of departments does not equal 285 due to departments submitting to multiple locations.

Although fingerprinting is not mandatory for misdemeanor arrests in Massachusetts, 90 departments reported submitting fingerprint cards for misdemeanor arrests. Additionally, 28 departments reported submitting less than half the time and 127 departments reported NOT submitting fingerprint cards for misdemeanor arrests.

Appendix II

Police Departments Responding to the Automation Survey

Police Department	Population*
Abington Police Department	14,467
Acton Police Department	18,371
